## 2. General Information

The **Norwegian Business Register** is a **free** app for Microsoft Dynamics 365 Business Central.

This app automatically updates customer-, vendor- and contact information easily by using information provided by the official authority for the registration of business in Norway (called Brønnøysundregisterene in Norwegian).

This register contains information about all companies, freelancers and organizations registered in Norway. You can apply the provided information like organization number, address (city, postal code), homepage and company name to your customer, vendor and contact card in 365 Business Central.

Use Assisted Setup to set up and activate the app. Search after **Blue Subscriptions** to show and handle subscriptions:

App Name	Status
Blue Apps & Subscriptions	Activated
Blue Payroll Data Import	Activated
Blue PEPPOL Participation	Activated
Norwegian Business Register	Activated

**Trial Details** ▾

App Name	Blue PEPPOL Participation
Trial Period	30D
Trial Period End Date	

### 3. Permission

Search for **permission sets** starting with **BSW** to assign it to your users.

### 4. Business functionality

The app is already installed and configured automatically with a default configuration after the installation. You can already use this app to help you create customers, vendors and contacts.

If you create or update a customer, vendor or contact **name** (or **VAT Registration No.**) you will automatically get a list of suggestions of companies registered in the Norwegian Business Register. **Apply** to copy name, address and VAT Registration No. to the entity card.

If you do not wish to apply the new information you can close the list or click on Cancel.

## 5. Setup

The Norwegian Business Register Setup allows you to:

- activate / deactivate the app
- activate or deactivate messages that appear while using the application
- pre-define the VAT format rules
- choose the type of address which will be picked from Norwegian Business Register (Business Address or Postal Address)
- define the result size for the number of records shown in the search
- define a filter for the organization type ("All" is set by default)
